

Profile

Hayden Collins

Specialisations

Hayden Collins is a specialist in risk, human judgement and decision making, organisational culture, leadership, communication and learning. Hayden provides training, advice, coaching and mentoring for leaders, managers, supervisors and workers. Hayden has developed and delivered training programs covering a range of subjects including; risk and safety leadership, organisational culture awareness and assessment, and communication and team-building. Hayden is able to help organisations apply the fundamentals of social psychology to leadership, supervision, team development and staff development.

Experience

Hayden has 11 years experience in risk and safety leadership roles within large national and multinational organisations across a range of industries including: heavy industrial manufacturing, FMCG manufacturing and telecommunications.

Hayden is able to use his expertise in leadership, communication, coaching, organisational culture, research, systems development and human behaviour to serve a wide range of needs. He has implemented and audited risk management systems, conducted organisational culture assessment and analysis, and provided training, advice and mentoring regarding risk and safety

leadership within the organisations he has worked with.

Hayden is an accomplished presenter and coach and has presented at National conferences.
